

Tonbridge Circular via Tudeley walk

A unique church, orchards and a country park of historical interest in the Garden of England.

Length **Main Walk:** 19¼ km (12.0 miles). Four hours 30 minutes walking time. For the whole excursion including trains, sights and meals, allow at least 8½ hours.

Long Walk, extended via Capel: 25¼ km (15.7 miles). Six hours walking time.

OS Maps Explorers 136 (for Tudeley and Capel) & 147 (for Haysden). Tonbridge, map reference TQ587460, is in Kent, 10 km **SE** of Sevenoaks.

Toughness 3 out of 10 (5 for the Long Walk).

Features This varied walk takes in a low-lying area of parkland, farm fields, paddocks, orchards and a country park of historical interest in the **Medway Valley** around **Tonbridge** (pronounced *Tunbridge*: see Walk Notes). It is not a particularly scenic walk but it does include the chance to visit a unique church.

There is nothing remarkable about the exterior of **All Saints, Tudeley**: an old guidebook described it as “obscure and unfrequented”. Nowadays the reverse is true, because its twelve stained glass windows were all designed by the great 20thC Russian artist, **Marc Chagall**. Initially commissioned by Sir Henry and Lady d'Avigdor-Goldsmid to create a single memorial window after the death of their daughter Sarah in 1963, Chagall was inspired to create windows for the entire church (as he had previously done for a synagogue in Jerusalem and a chapel in France). The final group of windows were dedicated in 1985, a few months after his death at the age of 98.

Tudeley's sister church at Capel is on the Long Walk route (see below). For understandable reasons **St Thomas à Becket** tends to be overlooked but it has a series of 13thC wall paintings. The church is no longer used for regular services but is normally open from 10am-4pm.

After a lunch stop in a country pub the walk loops back to Tonbridge, with the riverside route into the town centre being rather more appealing than the urban stretch at the start of the walk. The remainder of the afternoon is a loop through **Haysden Country Park** to the west of the town, a popular recreational area alongside the River Medway. Its most obvious features are the large fishing and sailing lakes created after sand and gravel extraction ceased in 1980, but closer inspection will reveal the chequered history of several attempts in the 19thC to improve navigation on the river by altering its course and building canals.

Although the Leigh Flood Relief Barrier should protect Tonbridge, flooding can still occur in exceptional conditions.

Additional Notes This walk was completely revised in 2019. The original version went via Tudeley and Capel to Hadlow, with the option of extending the walk back to Tonbridge. As Hadlow Tower is no longer regularly open to the public there was little reason to retain the long and relatively featureless approach to it across the Medway valley (it is still the destination of the Hildenborough to Hadlow or Tonbridge walk).

Walk Options As mentioned above you can extend the walk after Tudeley with a 6 km loop via the original walk's lunch pub in Capel. This **Long Walk** ventures further into the low hills on the side of the valley but you will need to be prepared for some tricky navigation as there is little or no waymarking in these woods and orchards; the directions attempt to describe the right of way but it is easy to go astray and end up hunting for the stiles and gates on the 'correct' route.

The Main Walk has a Figure-of-8 shape and you can easily shorten both it and the Long Walk by cutting out some or all of the afternoon loop through Haysden. Several **short cuts** are described inside the Country Park but you could omit it altogether, either by looping around the large recreation ground or simply heading directly to the station.

A few other short cuts are mentioned in the directions. In particular you could take a more direct route out of Tonbridge at the start, although the most direct route would be an unappealing stretch along a busy main road.

Transport There are four to six fast trains an hour from Charing Cross to Tonbridge, taking 40-45 minutes. There is no longer an alternative direct service via East Croydon and Redhill, although trains are sometimes diverted onto this route.

If you wish to abandon the walk on its eastern loop there is an infrequent bus service (Mon–Sat) along the B2017, passing Tudeley church and the two crossing points on the Long Walk.

If driving, Tonbridge station car park costs £7.50 Mon–Fri, £4.80 Sat, £1 Sun & BH (2020).

Suggested Train Take the train nearest to **09:45** from **Charing Cross to Tonbridge**.

Lunch The suggested lunch pub on the **Main Walk** is the **Poacher & Partridge** in the hamlet of **Tudeley Hale**, after 8 km. This 'Country Pub & Dining' establishment has a large back garden as well as a patio area at the front, and serves good food all day.

This pub would also be a late stop on the **Long Walk** (after 13-14 km), but this variation passes two others which are more conveniently placed. The **George & Dragon** (01892-832521) is on the B2017 between Tudeley and Capel churches, after 7¾ km; it has a back garden away from the road and serves traditional pub food. The suggested place, however, is the **Dovecote Inn** (01892-835966) in the hamlet of **Capel**, after 9 km. This popular freehouse has an attractive patio area at the back, serves a selection of real ales from casks behind the bar and good freshly-cooked food to 2pm (3pm Sun & BH).

On both walk options there are of course many options for a late lunch when you go through the centre of **Tonbridge** at the end of the eastern loop, with a wide choice of pubs, restaurants, cafés and coffee shops. The three High Street pubs close to the walk route are **The Humphrey Bean** (01732-773850), a JD Wetherspoon's pub in the old Post Office building; just across the river **The Gatehouse** (01732-368529) “a smart chain pub...with uncluttered contemporary decor” is directly opposite the more traditional **Ye Olde Chequers Inn** (01732-358957).

Tea As noted above there are plenty of cafés, coffee shops and pubs in **Tonbridge**. Two places close to the walk route when you pass through it in mid-afternoon are **Beyond the Grounds** (01732-667564; closed Mon) in River Walk and **The Bakehouse at 124** (01732-360382; closed Sun), next to the Chequers Inn. There is also a conveniently-placed **Park Café** in Haysden Country Park.

Some places near the end of the walk are **Nancy's Tea Rooms** (01732-300401; open to 5pm Mon–Sat, closed Sun) in a side street, a **Caffè Nero** (01732-351356; open to 6.30pm Mon–Sat, 6pm Sun) on the High Street and – the suggested tea place, serving good home-made cakes – the **Finch House Café** (01732-771775; open to 6pm Mon–Sat, 5pm Sun) at the front of the Pavilion Shopping Centre.

Walk Options (Main | Long)

M. Main Walk (19¼ km)

- i. Main Walk, omitting Haysden loop (16½ km)
- ii. Main Walk, omitting the Country Park (14 km)
- a. Long Walk, extended via Capel (25¼ km)
- ai. Long Walk, omitting Haysden loop (22½ km)
- aii. Long Walk, omitting the Country Park (20 km)

Walk Directions

A. Tonbridge Station to Strawberry Vale (1¾ km)

There is no good way out of Tonbridge to Somerhill Park. To avoid as much traffic as possible the suggested route goes via the recreation ground to the castle and then cuts diagonally across the town on quieter paths and residential streets.

1. Arriving from London at Tonbridge¹ station, go up steps near the front of the platform to emerge on a busy main road. Unless you want to take a (rather uninspiring) direct route out of the town, **turn left** onto Quarry Hill Road.
 - For the alternative route **turn right** instead, cross the road at the lights and go along Priory Road. The main route joins from Strawberry Vale on the left 150m beyond the railway bridge. If you take this short cut (saving 1¼ km), resume the directions in §B.
2. For the main route go down the slope and past a roundabout into the start of the High Street. Almost immediately **turn left** into Avebury Avenue, then take the first right into River Lawn Road. Towards the end of this short street, bear left onto a tarmac path cutting across a patch of grass towards a branch of the **River Medway**.
3. Cross a footbridge over a water channel (Gas Works Stream) at Buley's Weir and go alongside the river for a short distance. Opposite the entrance to **Tonbridge Memorial Garden**² **cross the river** on a footbridge into the **Racecourse Sportsground**³.

4. Take the path directly away from the river. In front of the sports pitches **veer right**, signposted to the Castle and Swimming Pool. In 100m cross another branch of the river on either of two footbridges. On the other side keep right to go between a large **outdoor model railway**⁴ and the entrance to the **Swimming Pool**.
5. Cross a stream on a footbridge and go straight ahead at a path crossing, signposted to the Castle & Tourist Information. Follow the path uphill and round to the right to come to the Gatehouse entrance of **Tonbridge Castle**⁵.
 - You might like to detour into the Castle Courtyard, either now or in the afternoon when the walk route comes back past it on the riverside path. There are far-reaching views from the top of the tall Motte (mound) which you have just skirted.
6. To continue the walk carry on past the entrance onto a path curving down to the right outside the castle wall, which brings you back to the High Street in front of the town's **Big Bridge**. Turn right onto the main road to cross the river, briefly heading back towards the station.
7. Go past the broad River Walk, cross over at the lights and turn off the High Street into a small pedestrian area (Botany) with a modern **glass sculpture**⁶. Continue on a street (Sovereign Way) past a Waitrose store and its car park. At the far end go back across Gas Works Stream and bear left onto a shared cycle/pedestrian path between more car parks, heading **SE**.
8. Cross a road (Avenue du Puy) at the lights to continue on the tarmac pathway, which eventually swings right and crosses another water channel (Botany Stream). Go straight across Vale Road onto the right-hand side of the narrow road opposite (Strawberry Vale), in order to pass safely under the low railway bridge. At a T-junction **turn left** onto Priory Road.

B. Strawberry Vale to Somerhill House (2¼ km)

9. Follow Priory Road round to the right and steadily uphill, where it becomes Goldsmid Road after the junction with Hectorage Road. At the top of this long residential street turn left onto the A2014 (Pembury Road). Go downhill on the left-hand side of this main road to the large Vauxhall roundabout.
10. You have to get across the A26 on the left, so use the traffic island and **cross this busy main road with great care**. On the other side continue briefly along Pembury Road, then **turn left** past North Lodge into the gated driveway to **The Schools at Somerhill**⁷, joining the **Tunbridge Wells Circular Walk**⁸ (TWCW).

This is a public footpath so the side gate should always be open. However, Somerhill Park is not open access so take care to stay on the right of way, as described below.
11. Follow this driveway through a wooded area and then across a bridge over the edge of a large lake. The drive continues alongside the lake, veering left in front of the attractive Lake Cottage. It curves back to the right and in 250m comes to a large "Private Property" notice. **Bear left** off the drive onto a broad grassy path through the parkland, dotted with mature trees.
12. Follow this mown path gently uphill for 500m, with yellow-topped waymarker posts at regular intervals to confirm the right of way. After crossing a small open area go through a wooden side gate onto the school driveway at a hairpin bend. Use the zebra crossing and continue uphill on the left-hand pavement, with the imposing **Somerhill House**⁹ up the bank on your right.

C. Somerhill House to Tudeley Church (2 km)

13. Ignore a zebra crossing by a small hut and continue down a short slope to the next crossing point. Cross the driveway here onto a long sunken path between stone walls, soon going under a bridge connecting the schools with their playing fields and later through woodland.
14. Leave the wood through a wooden gate and continue across a field, heading **E** (with Tudeley church ahead on your left, 800m away). On the far side go through the tree boundary and keep ahead at a junction of driveways. Follow the drive between fields and briefly round to the right through a belt of trees, then **veer left** onto a mown path. After passing through a line of poplars bear left to continue along the edge of a meadow.

15. In the corner follow the field edge round to the right, then in 50m **turn left** through a gap in the trees, crossing a plank bridge over a ditch. After crossing a wooden footbridge over a stream **turn right** as indicated, up a narrow path and out into a field. Follow a grassy path across a field towards some houses in the hamlet of Tudeley.
16. On the far side do not go out onto the B2017 but **turn left** along the field edge on a permissive path, leaving the TWCW. Go all the way to the field corner, passing a tree-lined pond after 250m. Turn right through a wide gap in the hedge and **cross the busy road with great care**. Go up a short driveway leading to **All Saints** church¹⁰ with its world-famous windows; its entrance is on the right-hand side. *If you are doing the Long Walk (with the Chapel extension), go to §E.*

D. Tudeley Church to Tudeley Hale (2 km)

17. Turn left out of the church and follow a grassy path to the back of the churchyard. Go out through a gate and continue in the same direction across a large field. On the far side go through a metal gate, across a small meadow and through another metal gate.
18. Keep ahead along the bottom of a grassy slope and through a parking area to the right of farm buildings. You are going out onto the lane ahead (Sherenden Road), but you are expected to take a short fenced path to the right of the driveway to bypass a locked fieldgate. Turn left onto the lane and follow it round a left-hand bend, passing an attractive farmhouse (Bank Farm).
19. Carry on along the country lane for 500m, passing under a railway bridge and following it round a left-hand bend. Where the lane turns sharply right **keep ahead** through a gap in a tall hedge onto a signposted footpath.
20. Continue in this direction through a large fruit farm for 300m, with trees and bushes on both sides. On the far side go through a gap in the hedge and keep ahead along the right-hand edge of a field for a further 300m, eventually coming out onto a lane (Hartlake Road). There is a pub 125m off to the right in Tudeley Hale, with the onward route being the continuation of the footpath opposite, slightly to the right.
21. To visit the pub **turn right** onto the fairly busy lane, passing the half-timbered **Tudeley Hall**¹³ and a few other houses in the hamlet. The **Poacher & Partridge** is on the right-hand side. Return the same way and **turn right** opposite Tudeley Hall onto the continuation of the footpath. *Continue the directions at §J.*

E. Tudeley Church to Capel Church (2¼ km)

22. Turn left out of the church and follow a grassy path to the back of the churchyard. Go out through a gate and continue in the same direction across a large field. On the far side go through a metal gate, across a small meadow and through another metal gate.
23. Keep ahead along the bottom of a grassy slope and through a parking area to the right of farm buildings. You are going out onto the lane ahead (Sherenden Road), but you are expected to take a short fenced path to the right of the driveway to bypass a locked fieldgate. Turn left onto the lane and follow it round a left-hand bend, passing an attractive farmhouse (Bank Farm).
24. For the extension **turn right** onto the track opposite the farm entrance (with a half-hidden footpath signpost confirming the right of way). Follow this track for 400m, heading **E** and going through a couple of side gates along the way. Where the hedge on the right ends **keep ahead** across the field towards a gap in the line of trees 100m away, now heading **ESE**.
25. On the other side of the gap **turn right**. Follow the field edge round to the left, alongside a wood. At the corner of the wood **keep ahead** again across a field, towards the left-hand end of another clump of trees. Follow the field edge around its corner to head **S** for 125m, with the trees on your right.
26. At the end of the trees **turn half-left** to go down across the field towards an isolated building on Five Oak Green Road. Cross the road carefully in front of the **George & Dragon** pub, with the onward route being the signposted footpath into the belt of trees to its left. *This is the first of two possible lunch pubs in this area; the Dovecote Inn is 1¼ km further on.*
27. To continue the walk, take the footpath through the belt of trees. At the end of the wood go over a stile and **turn left** to go around two sides of a field. At the end of the hedge on your left **turn half-left** to head **SE** on a faint path across the field. Go over a stile into the churchyard of **St Thomas à Becket**¹¹, another old church which is worth visiting.

F. Capel Church to Amhurst Bank (1½ km)

28. If you have been visiting the church, return to the footpath. This slopes down the bank in front of the church, leaves the churchyard via a stile in a low fence and cuts diagonally across a small field to its bottom corner. Go over another stile to come out onto Alders Road at its junction with Church Lane, with a farm drive opposite signposted as a bridleway.
 - If you are not planning to visit the Dovecote Inn you can take a direct route along this farm drive. At the top turn left onto Amhurst Bank Road and go along this narrow lane for 500m. After passing a large house up on the bank there are a couple of tracks off to the right, with the main route joining from the field on the left. If you take this short cut (saving ¾ km), resume the directions in §G.
29. For the main route **turn left** onto Alders Road, passing Church Lane and later Sychem Lane on the left. The road curves round to the right and comes to the **Dovecote Inn** on the right-hand side after 600m.
30. On leaving the pub, turn right to continue along Alders Road for 75m, then **go over a stile on the right** into a field. Follow a faint grassy path near its right-hand edge, gradually curving left to leave in the far left-hand corner. Continue along a grassy track near the edge of a wood.
31. In about 200m ignore a footpath waymarker pointing left. The path ahead seems to peter out and you need to bear right across some rough grassland to find a small metal gate into the bottom corner of an orchard. The exit is in its top left-hand corner, but there is no obvious route through the trees.
32. The suggested route is to start along its right-hand side, gently uphill on the broad grassy margin alongside a wire fence. In 125m, where the orchard opens out to the right, make your way past a few fruit trees to continue in the same direction up a broad grassy track. At the top of the orchard turn left in front of a hedge and go through some scrubland to find the exit, a small metal gate in the corner.
33. Go through the gate and past some trees into a field. Keep right to find another metal gate about 50m away in the hedge at the top of the field. Go through this onto a lane (Amhurst Bank Road), with two tracks opposite and a large house on the bank on your right.

G. Amhurst Bank to Half Moon Lane (1¼ km)

There is little or no waymarking through the orchards in this section and it is not easy to find the stiles and gates leading from one orchard to the next.

34. Take the right-hand of the two tracks, up a slope to the left of the house and into an orchard. Bear slightly right to go along a broad grassy path for a short distance, with rows of fruit trees on both sides. At the end of the fruit trees on the right **veer right** to find **an easily-missed footpath waymarker** directing you onto a path through a copse, with a large pond below on your right.
35. At the end turn left as indicated to go along the edge of a field, with the orchard behind a hedge on your left. In the field corner ignore a footpath down to the right and go through a small metal gate into another orchard.
36. The exit is about 200m away, slightly to the right. Start by going along the left-hand side, with a tall hedge on your left. At the corner veer right for a short distance, then **bear left** on a faint grassy path through the fruit trees to find the exit, a stile in the wire fence on the boundary.
37. Go over the stile and carry on through another orchard for 125m, staying near its right-hand side. Again you might have to search for the exit, a stile in a wire fence. Keep ahead for a further 125m along the right-hand side of a third orchard. At the end go through a small metal gate into a field.
38. **Turn right** to go along its edge. As you go round the field corner **veer right** into the tree boundary, going over a stile and across a plank bridge into a meadow. The right of way is to **turn left** along its edge as indicated, where in about 60m you would meet another path coming out of the trees and **turn sharp right** at a three-way footpath signpost to head **N** across the meadow.
On entering the meadow a faint grassy path going straight ahead implies that some walkers cut off this corner.
39. Both routes lead to the exit in about 150m, a gap in the tree boundary where it projects into the meadow. Go past a redundant stile into the corner of an irregularly-shaped orchard, with two paths ahead. The exit is in a corner 200m away, in a direction somewhere between these two paths.
40. The suggested route is to start along the right-hand path, then in 100m **veer left** onto a broad grassy strip between two rows of fruit trees, heading **N**. In the top right-hand corner of this part of the orchard go over a stile in the wire fence.

41. In this final orchard make your way past a few trees and carry on along its right-hand edge, alongside a row of tall poplars. At the end follow a path down through undergrowth and over a stile onto a lane.

H. Half Moon Lane to Five Oak Green Road (1¼ km)

42. Turn right briefly onto the lane, then in 30m **turn left through an easily-missed narrow gap** in the trees, with only an inconspicuous concrete footpath marker. Follow this woodland path downhill for 125m, across a stream on a plank bridge and up the bank to a path T-junction. Turn left as indicated, heading **SW** with the stream in a gully on your left.
43. In 60m the path swings right and comes to another path junction (with no waymarker) where you **turn right**. Follow this potentially muddy path gently downhill for 100m. At the bottom go straight across a path junction as indicated by a footpath waymarker, where a short path through some undergrowth soon becomes a much easier broad path.
44. Follow this clear woodland path for 300m, merging with another path from the right just before the end of the wood. Go over a stile into a meadow and continue on a broad grassy path, gradually approaching the tree boundary on the right. In 150m the path swings right and you go over a stile in the trees into a large farm field.
45. Go straight ahead across the field, heading **NNE** with a fine view ahead across the Medway valley (you might be able to see **Hadlow Tower**¹² slightly to the left, 5 km away). As the ground drops away you should be heading just to the right of a house in some trees. At the bottom of the field a footpath waymarker directs you onto a narrow path past the house and along its driveway to the B2017 (Five Oak Green Road).

I. Five Oak Green Road to Tudeley Hale (1¾ • 2 km)

46. Turn left onto the narrow grass verge in front of the house. After passing the house **cross the busy road with great care** and go down the quiet country lane opposite (Sherenden Road). In 400m it turns half-right and goes past a few cottages.
47. In a further 150m you come to some farm buildings on the left, with the footpath from Tudeley church joining from a driveway. Repeat a short section of your outward route down the lane, passing Bank Farm on the left.
48. Carry on along the country lane for 500m, passing under a railway bridge and following it round a left-hand bend. Where the lane turns sharply right **keep ahead** through a gap in a tall hedge onto a signposted footpath.
49. Continue in this direction through a large fruit farm for 300m, with trees and bushes on both sides. On the far side go through a gap in the hedge and keep ahead along the right-hand edge of a field for a further 300m, eventually coming out onto a lane (Hartlake Road). There is a pub 125m off to the right in Tudeley Hale, with the onward route being the continuation of the footpath opposite, slightly to the right.

50. Detour to the Poacher & Partridge (+¼ km)

To visit the pub **turn right** onto the fairly busy lane, passing the half-timbered **Tudeley Hall**¹³ and a few other houses in the hamlet. The **Poacher & Partridge** is on the right-hand side. Return the same way and **turn right** opposite Tudeley Hall onto the continuation of the footpath.

J. Tudeley Hale to Big Bridge (3½ km)

51. From Hartlake Road the footpath briefly heads **N** alongside the lane and then swings left in front of a house. Carry on along the right-hand edge of several fields, going over stiles in the hedges between them. After a short path across another field a gap in the hedge takes you onto a broad grassy strip, with a field on your right and later an orchard on your left. At the field corner keep ahead at a path crossing.
52. Cross a ditch on a wide plank bridge and continue along a broad grassy strip for 750m, heading **W** with a tall hedge on your left and a mix of orchards and meadows on the right. About 100m before the end of this path the right of way is to **veer left through an easily-missed gap** in the hedge, where you go through a small wooden gate and continue along a fenced path on the other side of the hedge. *If you miss this gap, another one at the end of the hedge implies that other inattentive walkers have been able to manufacture an alternative way out.*

53. At the end of the fenced path go through another wooden gate and turn left onto a lane. This soon comes to a T-junction with **Postern Lane**¹⁴ where you turn right. You now simply follow this lane for over 1 km, passing some fine Georgian-style houses (including "The Postern") along the way. As you approach Tonbridge the lane crosses a mill-stream on Postern Bridge and passes factory units off to the left.
54. The lane leads out onto the A26 next to its crossing of the **River Medway** on Cannon Bridge. Cross this busy main road carefully (using a traffic island off to the right if necessary) and take the path opposite, joining both the **Wealdway**¹⁵ (WW) and the end of the **Medway Valley Walk**¹⁶ (MVW). Follow the riverside path towards the town centre, with modern apartment blocks on both banks.
55. As you pass **Tonbridge Town Lock** you can see the town's **Big Bridge** ahead. There is no right of way along the final part of the riverside path, so to reach the High Street you need to veer left onto the adjacent street (Medway Wharf Road) at or soon after **Tonbridge Moorings**, where the riverside area has been enhanced as part of the **Medway Wharf**¹⁷ redevelopment.
- If you are doing the shorter ending (omitting the Country Park), go to §N.*

K. Big Bridge to Barden Lake (2½ km)

56. There are several places nearby if you want to break for refreshments, starting with **The Humphrey Bean** opposite. Cross the High Street carefully towards this pub and *turn right* to cross the River Medway on Big Bridge, with **Ye Olde Chequers Inn** and **The Bakehouse at 124** ahead on the left, and **The Gatehouse** pub on the right.
57. Unless you are detouring to one of these places *turn left* onto the riverside path; you are still on the Wealdway (described on a large information panel nearby) but the MVW gives way to the **Eden Valley Walk**¹⁸ (EVW). Follow the path below the Curtain Wall of **Tonbridge Castle**⁵ and past the **Boer War Memorial**.
- A path up to the right here gives you a second chance to detour into the Castle Courtyard and perhaps climb the spiral pathway to the top of the tall Motte.
58. To continue the walk carry on along the riverside path, with the mound behind a small moat on your right. At a path crossing *turn left* to cross a stream on a footbridge, briefly retracing a section of the main outward route. On the other side *turn right* to go through a small car park, passing the large **outdoor model railway**⁴ on your left.
59. At the end of the car park veer right across the access road to a larger car park to continue on the signposted WW (and EVW), with the tree-lined stream on your right. At the end of the car park the Tonbridge to Penshurst Cycle Route (CR 12) is behind the hedge on your left; you could also take this as the two routes stay together all the way to the Country Park.
60. The path eventually goes under a low railway bridge carrying the South Eastern main line. A further short stretch of tarmac leads onto a broad woodland path alongside a water channel, the outflow from the old **Powder Mills**¹⁹ site. In 200m you come to a path junction and *turn left*, signposted to **Haysden Country Park**.
61. Go across a couple of footbridges and follow the footpath (or CR 12) for 150m, soon passing a well-camouflaged WWII pillbox. Where the two paths merge again *cross the river* on **Lucifer Bridge** (with steel lattice sides), temporarily leaving the WW and EVW. Do not cross a second footbridge over a backwater but *immediately turn right* between metal barriers onto a narrow woodland path, leaving CR 12.
62. The path winds its way through the trees and goes down a short flight of steps to the perimeter path around **Barden Lake**. *Turn right* and go along its northern side. At the far end *fork left* to go past a picnic area and viewing platform over the water.
- If you are not doing a loop around the main part of the Country Park, go to §M.*

L. Around Haysden Country Park (3 • 1½ • ¾ km)

This section essentially goes out to the western end of the Country Park and returns along the other side of the railway embankment. There are several connecting paths under the railway and two possible short cuts are described.

63. Take the broad track heading **SW** away from the lake, under the bridge carrying the Redhill–Tonbridge railway line²⁰. On the other side **fork right** to come to the **Park Café** and toilets.
64. Keep right to go through the car park for 100m. As it curves round to the left **turn right** onto a path signposted to Haysden Water, soon crossing a backwater²¹ on **Shallows Bridge**.

65. Short Cut 1 (¾ km)

At the bottom of the footbridge **turn right** and follow the path under the railway line to **Stone Lock**. Turn right onto the path alongside the **New Cut** and resume the directions at [73].

66. For the longer routes **keep ahead** on the main path, which meanders between the railway and the reed-lined backwater (with a couple of side paths down to The Shallows). The main path crosses the backwater again on **Rainbow Bridge**, alongside an old railway bridge.

67. Short Cut 2 (1½ km)

At the bottom of the footbridge **turn right** and squeeze under the railway bridge on a slightly awkward path. At the entrance to **Heusenstamm Wood** follow the path round to the right and resume the directions at [72].

68. For the full route **turn left** onto a path between metal barriers. This soon crosses **Straight Mile Bridge** where you **turn right**, leaving the WW. Follow a tree-lined path alongside a disused waterway, the eastern part of the **Straight Mile**²².
69. At the end climb up the flood embankment ahead and bear slightly right down the other side towards a footbridge over a stream. Cross **Botany Bridge** and continue on a grassy track with plastic matting under the A21 flyover to the perimeter path around **Haysden Water**. Turn right and follow the path around two sides of this large sailing lake.
70. In the north-western corner of the lake **veer right** onto a path going under a railway bridge into the corner of a water meadow, leaving the EVW. The suggested route to start the return leg is the grassy path close to the River Medway on your left, but if the meadow looks waterlogged it is advisable to walk along the low embankment on its right-hand side.
71. Either way you go back under the A21 and over the flood embankment at the far end, with the riverside path providing a better view of the **Leigh Flood Relief Barrier**²³. Make your way to either of the two stiles leading into **Heusenstamm Wood**²⁴ ahead. The two woodland paths converge at the far end, where you go past a wooden sculpture and between metal barriers to leave the wood.
72. Follow a long straight grassy path through a meadow, ignoring **Friendship Bridge** across the main branch of the River Medway (the **New Cut**²⁵) on your left. At the end of the meadow you pass the derelict **Stone Lock**²⁶ on your right.
73. After going alongside the river for 150m **turn right** to cross a backwater on **Sharpe's Bridge**, signposted to Barden Lake. Follow the path out to its north-western corner and **fork right**, briefly repeating your outward route past the picnic area and viewing platform.

M. Barden Lake to Tonbridge Station (2¼ • 2½ km)

74. Detour to the Park Café (+¼ km)

If you want some refreshments before returning to Tonbridge, take the broad track heading **SW** away from the lake, under the bridge carrying the Redhill–Tonbridge railway line²⁰. On the other side **fork right** to come to the **Park Café** and toilets. Return the same way and **fork right** in front of Barden Lake.

75. Follow the perimeter path (or the parallel cycleway, CR 12 again) around the southern and eastern sides of the lake. After the two paths merge near its north-eastern corner **turn right** with CR 12 into the trees, signposted to Barden Bridge. Inside the wood **fork right** at path junctions, leaving CR 12 at the first junction and eventually joining a tarmac path leading into a grassy area dotted with trees.

76. The path straightens out to run between hedges, soon with allotments on the right. At the end go between barriers and cross a street onto a tarmac footpath to the right of a chainlink fence, which leads to a footbridge across the South Eastern main line. On the other side go straight across Nelson Avenue onto Barden Road.
77. Follow this residential street for 350m. After passing Barden Park Road it swings right and there are occasional glimpses of the river and recreation ground off to the left. Opposite the fourth side street (Preston Road) **turn left** onto a signposted footpath, a tarmac path running alongside the river. In 200m keep ahead past a footbridge.
78. In 100m the tarmac path comes to a small green. Make your way diagonally across it to the far corner, crossing over the main outward route (or detour round to the left by Buley's Weir if the direct route is blocked by construction work).
79. Follow the path into a short side street (Lamberts Yard), passing **Nancy's Tea Rooms** on the left. At the end turn right onto the High Street, with some more refreshment places on the way to the station: there is a **Caffè Nero** on the right and the **Finch House Café** across the road at the front of the Pavilion Shopping Centre.
80. To complete the walk make your way onto the right-hand side of the High Street and follow it up the slope beyond the roundabout. The station entrance is at the top; trains to London usually leave from Platform 2 (down the steps on the left).

N. Big Bridge to Tonbridge Station (2½ • ¾ km)

For this shorter ending, the suggested route in [81] follows the main route for 1 km and then loops back through the large recreation ground. The most direct route to the station would be to walk along the High Street, but the alternative route in [82] is not much longer and goes past some additional tea places away from the town centre.

81. Suggested route (2½ km)

- There are several places nearby if you want to break for refreshments, starting with **The Humphrey Bean** opposite. Cross the High Street carefully towards this pub and **turn right** to cross the River Medway on Big Bridge, with **Ye Olde Chequers Inn** and **The Bakehouse at 124** ahead on the left, and **The Gatehouse** pub on the right.
- Unless you are detouring to one of these places **turn left** onto the riverside path; you are still on the Wealdway (described on a large information panel nearby) but the MVW gives way to the **Eden Valley Walk**¹⁸ (EVW). Follow the path below the Curtain Wall of **Tonbridge Castle**⁵ and past the **Boer War Memorial**.
 - A path up to the right here gives you a second chance to detour into the Castle Courtyard and perhaps climb the spiral pathway to the top of the tall Motte.
- To continue the walk carry on along the riverside path, with the mound behind a small moat on your right. At a path crossing **turn left** to cross a stream on a footbridge, briefly retracing a section of the main outward route. On the other side **turn right** to go through a small car park, passing the large **outdoor model railway**⁴ on your left.
- At the end of the car park veer right across the access road to a larger car park to continue on the signposted WW (and EVW), with the tree-lined stream on your right. At the end of the car park the Tonbridge to Penshurst Cycle Route (CR 12) is behind the hedge on your left; you could also take this as the two routes stay together all the way to the Country Park.
- The path swings round to the left and later crosses a side stream on a wooden footbridge. In a further 200m, on the other side of a tree boundary, **turn left** at a path junction (leaving all the waymarked trails). Follow the path across a branch of the River Medway into the **Racecourse Sportsground**³, where there are several ways back to the town centre.
- The suggested route is to **turn right** and follow the perimeter path around the edge of this large recreation ground for 800m, for most of the way with the other branch of the River Medway on your right. Immediately after passing a children's playground **cross the river** on a footbridge and **turn left** onto a tarmac path, staying close to the river.

g. In 100m the tarmac path comes to a small green. Make your way diagonally across it to the far corner, crossing over the main outward route (or detour round to the left by Buley's Weir if the direct route is blocked by construction work).

82. Alternative route (¾ km)

- a. There are several places nearby if you want to break for refreshments, starting with **The Humphrey Bean** opposite. Cross the High Street carefully towards this pub and continue on a broad pedestrian pathway (River Walk), leaving the WW and MVW. You pass **Beyond the Grounds** (a café) and the pub's beer garden, with a fine view of **Tonbridge Castle**⁵ across the river.
- b. At the end of River Walk keep ahead on a cycleway to the left of a modern apartment block (Waterside Lodge). At the far end the path veers right to pass between **Tonbridge Memorial Garden**² and the river. You briefly retrace a section of the main outward route, but immediately after crossing the water channel at Buley's Weir **turn sharp left**.

83. Follow the path into a short side street (Lamberts Yard), passing **Nancy's Tea Rooms** on the left. At the end turn right onto the High Street, with some more refreshment places on the way to the station: there is a **Caffè Nero** on the right and the **Finch House Café** across the road at the front of the Pavilion Shopping Centre.

84. To complete the walk make your way onto the right-hand side of the High Street and follow it up the slope beyond the roundabout. The station entrance is at the top; trains to London usually leave from Platform 2 (down the steps on the left).

Walk Notes

1. **Tonbridge** has always been pronounced *Tunbridge* and was often spelt that way. The 'o' spelling became standard in the late 19thC to help distinguish it from its spa neighbour Tunbridge Wells, which retained the 'u' spelling.
2. **Tonbridge Memorial Garden** was created after World War I "in grateful memory of the men of this town who died in the service of their King and Country".
3. **Tonbridge Racecourse Sportsground** was used for horse racing from 1851-74. This large meadow between two branches of the River Medway was acquired by the Urban District Council in 1923 for the benefit of local sports clubs and is now a large public park.
4. The **outdoor model railway** is run by Tonbridge Model Engineering Society, who offer public rides on summer weekend afternoons.
5. **Tonbridge Castle** dates from the 13thC, with the imposing gatehouse being completed in 1260. An earlier motte and bailey castle was destroyed after a failed rebellion against William I in 1088. The site is now owned by the local council and the grounds are a public park.
6. The **glass sculpture** at the entrance to Botany is by local artist Guy Portelli, and represents the River Medway flowing through the town.
7. **The Schools at Somerhill** is the title given to a group of independent schools, for boys aged 3-13 and girls aged 3-11. The three schools were at Tunbridge Wells before moving into Somerhill House in the 1990s.
8. The 44 km **Tunbridge Wells Circular Walk** (formerly the High Weald Walk) was established by the Borough Council as one of its centenary events in 1989.
9. **Somerhill House** is a Grade I listed Jacobean mansion, dating from the early 17thC. It was greatly extended in the late 19thC when it was owned by the Goldsmid family, becoming the second-largest house in Kent (after Knole).
10. **All Saints, Tudeley** was almost completely rebuilt in the 18thC, but there has been a church on the site since Saxon times. The 16thC tomb of George Fane in the chancel is one of the few survivals from an earlier period. The Chagall windows were installed in stages between 1967 and 1985, with the Victorian chancel windows representing the four evangelists being re-sited in the vestry.
11. **St Thomas à Becket, Capel** is dedicated to the Archbishop murdered in Canterbury Cathedral in 1170; Becket himself is said to have preached by an old yew tree in the churchyard. The 13thC wall paintings on the north wall were discovered during restoration in 1927. The church is in the care of the Churches Conservation Trust and only used for occasional services.

12. **Hadlow Tower** is a multi-tiered Gothic folly (taller than Nelson's Column), built in 1838 by William Barton May as an embellishment to his equally eccentric father's extravagant house in Strawberry Hill Gothic style.
13. **Tudeley Hall** was extensively modernised in the 1930s, when the 16/17thC house was given an attractive Tudor style popular at the time.
14. **Postern Lane** was one of the main approaches to the town in medieval times, leading through its inner park to the postern (ie. back door) of Tonbridge Castle. Some of the grand houses in **Postern Park** were built around much older properties.
15. The **Wealdway** runs for 130 km through the Kent and Sussex Weald, from Gravesend on the Thames estuary to the outskirts of Eastbourne.
16. The **Medway Valley Walk** runs alongside the river for 31 km, between Rochester and Tonbridge.
17. **Medway Wharf** was where barges were loaded and unloaded. The river was made navigable between Maidstone and Tonbridge in the 1740s and was profitable for 100 years, until the coming of the railways. It was claimed to be "the most irregular and worst constructed navigation in England" as it had no towpath and barges had to be hauled by teams of men.
18. The **Eden Valley Walk** runs for 24 km, from Tonbridge to a remote spot on the Vanguard Way west of Edenbridge. The section to Penshurst (where the River Eden flows into the Medway) is essentially a continuation of the Medway Valley Walk.
19. Gunpowder was manufactured at the **Powder Mills** site from 1813 until its closure in 1934, with the channels from the River Medway providing the water power for grinding and mixing the ingredients. The site has been redeveloped for housing but traces of its former existence have been preserved in place names.
20. The **Redhill–Tonbridge railway line** opened in 1842 as part of the main line between London and Dover, and retained that status until the direct line via Sevenoaks opened in 1868.
21. **The Shallows** are the original course of the River Medway before the attempts to straighten it for navigation. The surrounding area is gradually reverting to marshland.
22. The **Straight Mile** was dug in the 1830s in an attempt to straighten out the River Medway for navigation. The canal (now cut in two by Haysden Water) never filled with water and the project was abandoned.
23. The **Leigh Flood Relief Barrier** was completed in 1981. The embankment acts as a dam and a large area of water meadows can be flooded to hold back the water (although it did not have enough capacity to fully protect Tonbridge in the winter storms of 2013/14).
24. The trees in **Heusenstamm Wood** were donated from Tonbridge's twin town in Germany after the 1987 storm. The wood is on the site of a large weir which controlled water levels before the construction of the Leigh Flood Barrier.
25. The **New Cut** was a later and more successful attempt to straighten out the meanders of the original river, and is now the main channel.
26. **Stone Lock** is at the eastern end of the Straight Mile, where the canal joined the River Medway. The huge blocks of stone were reputedly taken from Tonbridge Castle.
